

27 September 2011

Dear Friends,

Thanks to you, the next generation is being trained in missionary aviation. The 2011 Fall Orientation began 12 days ago with three orientees being mentored and trained in aviation maintenance and flight. Dennis has been teaching many classes and overseeing

lab time after most classes. He has also been developing additional PowerPoint presentations for more effective training. This group of pilot mechanics will be serving with our partners in South America and Africa.

Thanks to you, the next generation is being evaluated through aviation technical evaluations. The young man that is here for an evaluation this week had his first contact with JAARS several years ago when he talked with Dennis at Oshkosh. After a successful assessment, he will be serving with JAARS.

Thanks to partners like you, there are books being shipped to East Asia, Philippines, Southeast Asia, Tanzania, and Mexico. Taylor, our granddaughter, and

I have entered over one thousand donated books into a secure website. I have created an e-mail distribution list of our field schools, associate schools, and homeschoolers in remote locations. Anyone on the distribution list can choose the titles they want and then the books are shipped to them for the cost of postage.

Thank you for your support as we continue to reach around the world providing God's Word to the Bibleless. Your partnership through finances and prayer allows us to believe with confidence that the remaining two thousand two hundred language groups will gain access to the Word. Your commitment to us helps speed Bible translation through aviation and education.

Serving with you,

Dennis and Patti
